Engage with some of the most inspiring educators of our time as the New Pedagogies for Deep Learning network meets for its annual Deep Learning Lab.

Here, the world’s most energized educators gather to stretch their imaginations, share their work and reflect on the impact deep learning is having on students and staff. Our common purpose is fostering deep learning so that all learners contribute to the common good, address challenges and flourish in a complex world. Join leaders, teachers, students, and partners from Australia, Canada, Finland, Netherlands, New Zealand, United States, Uruguay and beyond.

April 16-17

We know that when students are given an opportunity to fly, they soar. During the conference students from across the world will participate in a deep learning challenge. Prepare to be inspired.

Students at the Centre

Immerse yourself in a richly designed deep learning task and participate in an intensive collaborative examination of student work and classroom pedagogy.

Collaborative Moderation

Experience what deep learning looks like on the ground...in classrooms, schools and systems. Savvy practitioners from all over the globe share what they are creating and learning in their efforts to enhance learning for all students. There will be more than thirty sessions to choose from—and none of them repeated.
